**YELLOW**

The nature and global-inspired theme continues with our second colour pick in the spotlight. In fashion, varying shades of yellow pervaded the Spring/Summer '18 collections... in interiors though, it isn't that intimidatingly bright yellow, instead it is an earthy, golden ochre, some call mustard, a shade which works well with the warmer colour palette that we are gravitating to this year.

In an earth-toned space, mustard yellow adds the final touch to lighten the mood. Although it pairs well with just about any colour scheme, mixing ochre with navy will create a rich and sophisticated look.

**HISTORY LESSON:** A natural material, Ochre is a natural clay and was the most commonly used pigment for painting walls in the ancient Mediterranean world.

Staub Round COCOTTE, \$379.99; thebay.com
